

Document Tracking & Archiving System

A complete user manual for registration, workflows, access control, and compliance.

Chapter 1: System Overview

Introduction & Purpose

This manual describes how the system centralizes document capture, tracking, and archive workflows. It replaces manual paper-based processes with secure digital routing and audit history.

Core Capabilities

The platform includes a centralized repository, metadata search, OCR processing, role-based access control, and workflow dashboards for pending, received, and completed items.

Chapter 2: Getting Started

Organization Registration

Register a new organization with company details, administrator contact, and preferred subscription tier.

Secure Login Policies

First-time login requires a strong password update with mixed character types.

Chapter 3: Command Center

Administrator Dashboard

The dashboard provides an executive overview of documents, workflows, and alerts.

Subscription Management

Monitor plan usage and adjust storage or user limits.

Chapter 4: Identity & Access Management

Managing Users

Add, edit, and suspend user accounts for your team.

Creating Functional Teams

Organize users into teams for workflow routing.

Chapter 5: Digital Repository

Category Management

Define document categories for consistent repository structure.
